PROFILE SUMMARY

Python Developer & Full Stack Developer with expertise in Python, Django, Django REST Framework (DRF), FastAPI, REST APIs, React.js, and JavaScript. Experienced in designing and developing scalable SaaS and ERP platforms, multi-tenant architectures, RBAC-based access control, and automation pipelines. Skilled in ETL development, data integration, web scraping, and API design. Strong background in microservices, monolithic applications, and full-stack development, with a focus on performance, scalability, and maintainability.

SKILLS AND TECHNOLOGIES

Languages: Python, JavaScript (ES6+), SQL
Backend: Django, Django REST Framework (DRF), FastAPI
Frontend: HTML5, CSS3, React.js
Databases: PostgreSQL, MySQL,Sql Sever
Tools & Data: Git,GitHub,Postman,Swagger
Data & Automation: ETL Pipelines, Web Scraping, Automation Scripts

WORK EXPERIENCE

NILE Hospitality (Software Division), Udaipur — Aug 2023 - Feb 2025

Python Developer

- Developed SaaS-based ERP for hotel operations & HRM to centrally manage 20+ hotel properties, enabling seamless cross-property access and reporting.
- Built scalable HRM & Workforce Management System (payroll, leave, attendance, designations, budget allocations, vacancy tracking) reducing manual HR workload by 40%.
- Designed centralized hiring & interview portal with resume parser, automated candidate matching, and assessment workflows, cutting HR screening and scheduling efforts by 50%+.
- Implemented onboarding, performance & appraisal systems with automated letters, KRA tracking, and appraisal cycles, reducing paperwork and performance tracking efforts by 45%.
- Created ETL pipelines & centralized reporting system combine multi-source HR/operations data, improving transparency and reducing reporting workload by 60%.
- Integrated 3rd-party attendance APIs & automated payroll workflows, reducing payroll processing time and compliance risks.
- Established SaaS architecture with RBAC & dynamic workflow mapping, ensuring scalability, security, and role-based access across multiple organizations.

PROJECTS WORK

- **Full-Stack Blog Platform (Running)**: Developed a full-stack blogging platform with Django, DRF, PostgreSQL, and React.js. Built a scalable backend supporting users, authors, posts, comments, likes, and collections. Implemented personalized feeds, analytics dashboards, and real-time notifications to improve user engagement.
- **Book Management System (BMS)**: Designed and implemented a multi-tenant library management system using FastAPI, React.js, PostgreSQL, SQLAlchemy, and Pydantic. Developed modules for book CRUD, issue/return workflows, fine calculation, and user profile management.Secure file upload APIs with RBAC-based access control.

- **Shop Management Dashboard (ETL)**: Developed a multi-shop management dashboard with Django, MySQL, and Bootstrap 5. Integrated Google Sheets API to enable automated data synchronization of purchase and sales records. Designed real-time inventory tracking and sales analytics dashboards with user-specific access controls.
- **Real-Time Chat Application**: Created a WhatsApp Web–style chat system using Django Channels, PostgreSQL, and JavaScript. Implemented one-to-one and group messaging with real-time communication, unread message tracking, file sharing, profile/group images, and dynamic chat search within an interactive dashboard.

EDUCATION

PRESTIGE INSTITUTE OF ENGINEERING MANAGEMENT & RESEARCH Indore
Bachelor of Technology Electrical Engineering CGPA: 7.57

CERTIFICATIONS

Python and Django - Universal Informatics Indore.
